***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The instant invention distinguishes itself over the prior art, specifically over Fujioka because the reference teaches a multiple layered non-degradable polymer comprising water soluble drugs that is coated with a non-degradable hydrophobic polymer as an outer layer, said outer layer does not comprise a drug or active ingredient. Fujioka teaches the outer layer as being essential to the composition, and the outer layer does not comprise active agent. Thus one of ordinary skill in the art would not think it obvious to remove the outer layer. The drug formulation of Example 1 does not anticipate or render obvious the instant invention because the drug formulation is a single layer formulation comprising the biologically compatible non-degradable polymer and the drug. The instant invention comprises at least two layers, and inner and outer layer, both of which comprise biologically compatible non-degradable polymer and the drug. The other distinguishing feature of the present invention is that each layer may comprise a different active agent or the same active agent in a different concentration than the outermost layer. Since Fujioka does not teach an outer most layer comprising a water soluble drug, then this reference does not anticipate or render obvious the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
